### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,3,13,14,15 & 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Balmer et al. (5,199,486) in view of Lopez (5,725,047). Balmer discloses a coated heat exchanger comprising: a non-stick surface such as TEFLON to prevent mineral/ice build-up, a helical/spiral heat exchanger array (30) consisting of a plurality of tubes (31) coated with said non-stick surface, a manifold (36) and situated adjacent to the heat exchanger for directing heat. Furthermore Balmer, discloses tubes consisting of any non-stick material such as tetra-fluoroethylene or its "derivatives". Moreover the heat exchanger is situated within a chamber filled with water (see column 2). Balmer heat exchanger lacks fins on surface. Lopez teaches a finned heat exchanger with fin material & fin module. Therefore it is deemed by examiner that it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the heat exchanger disclosed by Balmer with fins as taught by Lopez for improving the heat transfer between to fluids.

### ***Allowable Subject Matter***

Claims 6-12,16 and 18-21 are allowed over the prior art of record.

Art Unit: 3744

Claims 4 & 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***
